

Imam Fajri

South Jakarta, Indonesia | imamfajri.ze@gmail.com | [linkedin.com/in/imamfajri](https://www.linkedin.com/in/imamfajri)

SUMMARY

Information Systems undergraduate at Universitas Indonesia with hands-on experience as a full stack and backend engineer across Python (Django), Golang, and modern JavaScript frameworks (Next.js, Nuxt.js). Comfortable with PostgreSQL, Supabase, and Docker-based deployments, and experienced leading cross-functional teams as a project manager and operations lead. Actively seeking an internship in full stack, backend, DevOps, or project management roles to contribute to impactful engineering teams.

EDUCATION

Universitas Indonesia

Depok, West Java

Bachelor of Information Systems, Faculty of Computer Science — GPA: 3.29/4.00

Aug. 2023 – Present

- Recipient of Bayan Peduli Scholarship (Batch 1) covering 8 semesters of tuition.
- Twice-recipient of P2MW (Student Entrepreneurship Development Program) funding; KMI Expo finalist 2024 & 2025.
- Finalist, Hackathon UI 2025 (Funding Entrepreneurship track) and Satria Data 2024 (Infographic).

EXPERIENCE

Website Administrator

Dec. 2025 – Present

Innovation and Comparative Governance, Faculty of Administration Science

West Java, Indonesia

- Built and deployed a research website on WordPress, designing all pages to match research-team content requirements.
- Coordinated with DPER (Research Funding and Ecosystem Department) Universitas Indonesia to align website substance and information architecture.

Business Development Intern

Dec. 2025 – Apr. 2026

Blackmount Consultant (Remote)

United Kingdom

- Identified and evaluated potential consulting projects through targeted market and client research.
- Supported client engagement, proposal development, and deal-closing processes for international consulting work.
- Created persuasive pitch decks and presentations to communicate strategic value to prospective clients.

Researcher

Aug. 2025 – Dec. 2025

Ministry of Transmigration

Central Sulawesi, Indonesia

- Analyzed business processes and supply chain management for local commodities across transmigration areas.
- Built supply and value chain flowcharts mapping production, distribution, and stakeholder roles.
- Drafted policy briefs and a digitalization roadmap; co-authored an academic journal article on collaborative rural economies and Indonesian village-owned enterprises.

Full Stack Developer

Jun. 2025 – Dec. 2025

Bumindo Energi Sejahtera

South Jakarta, Indonesia

- Redesigned the company's sales recording and warehousing system, replacing manual workflows with a centralized web platform.
- Designed the underlying relational database schema in PostgreSQL to align with the company's sales and inventory flow.
- Rebuilt the company website on a modern JavaScript framework (Next.js) for improved performance and maintainability.

Web Developer

May 2025 – Aug. 2025

UI Student Dormitory, Universitas Indonesia

South Jakarta, Indonesia

- Redesigned the UI Student Dormitory website interface and rebuilt the system on a modern web framework.
- Coordinated with DSTI (Directorate of Information Systems and Technology) on the campus IT infrastructure used for deployment.

Assistant Lecturer

Jan. 2025 – Jun. 2025

Faculty of Computer Science, Universitas Indonesia

Depok, West Java

- Assisted the lecturer in preparing teaching materials and structuring weekly learning schemes.
- Graded student assignments and class participation; mentored students struggling with course material.

PROJECTS

Rimbahari | *Python, Django, PostgreSQL, Docker* — Backend Engineer & DevOps

- Built the backend of a knowledge-hub platform for Indonesian indigenous (adat) communities, exposing REST APIs in Django for content, contributors, and community resources.
- Designed and managed the PostgreSQL data model covering communities, articles, and user roles, with migrations handled via Django ORM.
- Containerized the application with Docker and Docker Compose to standardize local development and deployment environments.
- Owned DevOps responsibilities including environment configuration, image builds, and deployment pipelines for staging and production.

Wanara | *Golang, PostgreSQL, Docker* — Backend Engineer

- Developed backend services in Go for a mobile application connecting urban users with forest conservation efforts through a personal, transparent, and measurable tree-adoption experience.
- Implemented REST APIs for user authentication, tree-adoption transactions, and progress tracking, backed by PostgreSQL.
- Containerized services with Docker for consistent build and deployment across environments.

Rentee | *Next.js, Supabase, PostgreSQL* — Project Manager

- Led the product team building Rentee, a multi-vendor rental platform piloted at Universitas Indonesia; serves as Chief Executive Officer and received P2MW Digital Business funding (2025).
- Defined product scope, milestones, and sprint plans; coordinated engineering, design, and business development members from problem discovery through MVP launch.
- Selected as a finalist at KMI Expo 2025 (Tidar University, Magelang) organized by Belmawa, Kemendikbudristek.

LEADERSHIP & ACTIVITIES

Chairman

Pramuka Universitas Indonesia (UI Scout Organization)

Jan. 2024 – Dec. 2025

Depok, West Java

- Led a team of 20+ members across multiple divisions and coordinated with the Directorate of Student Affairs on scouting programs.
- Strengthened collaboration with university scout organizations across Indonesia and partner countries including Japan and the United Kingdom.

Staff, AI Innovation Challenge

CompFest, Faculty of Computer Science Universitas Indonesia

Mar. 2024 – Oct. 2024

Depok, West Java

- Supported judges in validating the functionality of participants' AI projects and prepared assessment sheets.
- Consolidated scoring data from each judge into structured spreadsheets for final ranking.

TECHNICAL SKILLS

Languages: Python, Go (Golang), Java, JavaScript/TypeScript, SQL
Frameworks & Libraries: Django, Next.js, Nuxt.js, Node.js
Databases: PostgreSQL, Supabase, MySQL
DevOps & Tools: Docker, Docker Compose, Git, GitHub, Linux
Other: REST API design, Project Management, Supply Chain Management, Microsoft Office (Word, Excel, Spreadsheet)
Soft Skills: Leadership, Communication, Time Management, Cross-functional Coordination
